## Projects in Laravel:

### Product (LMS):

Academic Approach (live application)

Online testing system.

Grading system.

Reporting system about class test results.

A web base system for tests fixed like SAT, ACT, etc. and formative for a US base client.

Built with Laravel and PostgreSQL . My role is a Team Lead in this project.

### I have also created following API's in laravel.

#### Freedom2Explore:

The Freedom2explore API is composed of services that can be used to find categories, locations and details of activities and hotels, both at fixed locations and along a route between locations.

The specific details are as follows: the categories available in each country, the nearest activities to a given location, activity details, activities en route between two locations, activities on alternative routes, the nearest hotels to a given location, hotels en route between two locations, hotels on alternative routes and hotel details.
